So as you may know, there are three basic ways that DEQ

Sep.			Case No.
	Page 6		Page 8
1	CHAIRMAN SHEPHERD: Approval of the Minutes for	1	receives money as an agency. One source is through fees,
2	the January 12th, 2017, Solid Waste Management Advisory	2	like the solid waste fees, that you're the most familiar
3	Council meeting.	3	with. For every ton of waste that goes into a landfill or a
4	MR. LINN: I'll move that	4	waste energy facility, the DEQ gets a dollar and a quarter.
5	MR. NEWMAN: I'll second.	5	And that goes into our Revolving Fund, and that makes up the
6	CHAIRMAN SHEPHERD; Quiana,	6	majority of the money that DEQ has, about 55 percent.
7	SECRETARY FIELDS: Mr. Adcock?	7	We also get about 38 percent of our funding through
8	MR. ADCOCK: Yes.	8	federal money. And then we depend on the Legislature to
9	SECRETARY FIELDS: Mr. Cleveland?	9	provide about seven percent of our needs, and those are
10	MR. CLEVELAND: Abstain.	10	appropriated dollars. And that's what you hear about the
11	SECRETARY FIELDS: Ms. Hershey?	11	most when you hear about the funding issues with the State
12	MS. HERSHEY: Yes.	12	and the State reducing appropriations to agencies.
13	SECRETARY FIELDS: Mr. Lazarski?	13	So what went on in fiscal year 2017, is that when the
14	MR. LAZARSKI: Yes.	14	Legislature was looking for sources of money to fund other
15	SECRETARY FIELDS: Mr. Linn?	15	things, they looked at various agencies and how much money
16	MR. LINN: Yes.	16	was left in their revolving funds. And they came to DEQ and
17	SECRETARY FIELDS: Mr. Newman?	17	took a million dollars from our Revolving Fund to use for
18	MR. NEWMAN: Yes.	18	other sources.
19	SECRETARY FIELDS: Ms. Phillips is in attendance.	19	Now, for next year, they have also agreed to give that
20	Ms. Phillips?	20	money back to us as part of our appropriations. So they
21	MS. PHILLIPS: Yes.	21	took a million dollars out of the Revolving Fund, but they
22	SECRETARY FIELDS: Mr. Torneten?	22	agree to give it back to us next year. Rather than reducing
23	MR. TORNETEN: Yes.	23	our appropriated dollars, they're going to give that million
24	SECRETARY FIELDS: Mr. Shepherd?	24	dollars back to us for fiscal year 2018.
25	CHAIRMAN SHEPHERD: Yes.	25	So if you think about it like this, it's kind of like
	CHARLES SHEET TOO	23	So is you draw about it like this, it's knitt of like
	Page 7		Page 9
1	SECRETARY FIELDS: Motion passed.	1	if I ask my kid to mow the yard and I say, "I'll give you
2	CHAIRMAN SHEPHERD: Discussion of Solid Waste	2	\$20 if you'll mow the yard," and they agree. I said, "Okay."
3	Program Fees and Expenditures. "The Council's comments	3	Now, go get me your piggy bank and give me \$20 and 1'll pay
4	concerning program fees and program expenditures are to be	4	you." That's kind of how this works.

7	Patrick.	7	dollars back from the Revolving Fund. So that's where we're
8	MR. RILEY: We do this every year in September and	8	at as an agency.
9	it's our statutory obligation to share with you information	9	You know, Solid Waste, as you know, depends entirely on
10	about Solid Waste expenditures and revenue that occurred	10	money from their Revolving Fund and only on solid waste
11	during the last fiscal year, and it's your obligation to	11	fees. So we're - we're self-funded. And if you look at
12	provide comments to our Executive Director and the Governor	12	the and that's when you can look at the reports and see
13	and the Legislature.	13	where that - how that money came in and where it went.
14	It's also our practice to share anticipated spending	14	CHAIRMAN SHEPHERD: The \$1.25 goes into
15	for the next fiscal year. So to that end, behind the third	15	Land Protection. It doesn't go into other parts of the DEQ,
16	tab in your notebooks, you'll find some reports about	16	does it?
17	Solid Waste spending and anticipated budgets for fiscal year	17	MR. RILEY: It is it goes into the
18	2018.	18	Revolving Fund, and it's – if you'll look at if you look
19	I also thought it would be helpful, before we get into	19	at the Solid Waste report, you'll see where most where
20	too much detail on those reports, to share a little bit	20	the money went. So if we - if we look at that first page,
21	about agency funding so that you're not considering the	21	fiscal year 2017, the upper right-hand corner, our actual
22	Solid Waste expenditures and budget in a vacuum. So if	22	income, for fiscal year 2017, is about 6.1 million. We had
23	you'll indulge me a minute, we'll talk a little	23	expenditures of 5.9 with about 151,000 left over at the end
24	about agency — what's going on with the agency.	24	of the fiscal year, money that was encumbered but not spent.
1 25	C	""	or one mount your, money man was encumurated but not spetit.

25 Some of that has to do with invoices that hadn't been paid

Page 10 Page 12 1 yet at the end of the fiscal year. should a need arise. I would rather have a higher budget So somewhere between -- if you take that money out of and then spend it if it comes in and if I can, and if I have 2 2 3 the remaining balance, we end up somewhere between 50 and 3 a need, then to budget too low and not have an option 4 \$150,000 remaining that would stay in the Revolving Fund and 4 available to me to spend the money. 5 5 carry over to the next year. So we spent between - or we MR. LINN: Thank you. 6 6 had about one to two-and-a-half percent left over. So we MR. RILEY: So you'll see a significant amount of 7 7 did a really good job of spending those dollars that came money listed in projects to be determined, and that gives us В 8 a lot of flexibility for projects that may not be 9 And the various --9 anticipated yet. 10 10 CHAIRMAN SHEPHERD: Does --CHAIRMAN SHEPHERD: What are we running - I mean, 11 MR. RILEY: Oh, go ahead. 11 have we looked at the tonnages that you're - that are 12 CHAIRMAN SHEPHERD: Does the other departments, 12 coming in? Are we i.e. Storm, Water, Air, they charge fees for permits, don't 13 13 MR. RILEY: If you look at tonnages over the last 14 14 they, typically? few years, they've been pretty consistent, right around 15 MR. RILEY: Some do. Water charges permitting 15 that -- oh, about five million or so, give or take a little 16 fees and Air does. 16 bit. So realistically -17 CHAIRMAN SHEPHERD: Does that go into the 17 CHAIRMAN SHEPHERD: I don't see that changing. 18 Revolving Fund? 18 MR. RILEY: - I would expect it to be pretty 19 MR. RILEY: It does. 19 consistent 20 CHAIRMAN SHEPHERD: Okay. 20 CHAIRMAN SHEPHERD: Five million tons a year? 21 MR. LINN: Patrick, I note that for 2018, 21 MR, RILEY: Roughly. 22 Product Stewardship isn't listed. And I remember from the 22 CHAIRMAN SHEPHERD: Is that what you said? 23 last meeting we talked about how that funds several things, 23 MR. RILEY: Yeah. CHAIRMAN SHEPHERD: We need to figure out how we 24 including the pilot Drug Take Back Program. Is that one 24 25 25 anticipated in 2018, couple of lines from the bottom, for can charge the disposal of like the saltwater and stuff like Page 11 Page 13 1 other Solid Waste projects to be determined? 1 that, rope them in. 2 2 MR. RILEY: Yeah, we -- we are funding MR. RILEY: We're open to ideas. 3 3 Project Stewardship Institute -(Laughter.) 4 4 MR. LINN: Okay. CHAIRMAN SHEPHERD: Any other questions from the 5 5 MR. RILEY: - next year for this - for this -Council? 6 6 for 2018. It just didn't show up as a line item. MR. NEWMAN: Just a comment. Chair. 7 7 MR. LINN: And so the \$6.7 million budget roughly, CHAIRMAN SHEPHERD: Yeah. В Я as compared to this \$5.9 million budget last year, I assume MR. NEWMAN: If I could make a comment, 9 would take into account the million you're going to have 9 I would encourage you not to be shy to ask the State 10 back? 10 for more money. Year after year we have been told, "You can 11 11 MR, RILEY: Yeah. So the budget numbers that come to us, but don't ask for money." I think that's enough 12 the 6.2 million, that we budgeted last year compared to the 12 of that... I think that the, you know, loud voice of the 13 13 6.6 or so that we have for next year populous is "Figure out ways to raise revenue, fund 14 1.4 MR. LINN: Oh, I beg your pardon. That's right, education," and I think protecting our environment is a 15 15 6.2 --worthy cause, as well. 16 MR. RILEY: So it's a -- you know, it's largely 16 So I know that our Chairman sent a letter that we all 17 a - a guess. You guys may agenda in the Tulsa Regional Chambers OneVoice Initiative to 21 21 know better than we do. Because you, that work in the waste fully fund different departments of our State government 22 22 industry, see the trends in waste disposal, because that's and -- so don't be shy. And I would be glad to be an 23 23 where the money is coming from. advocate. 24 24 But, you know, it's -- having that money there and MR. RILEY: 1 appreciate those comments. Thank 25 25 available in the budget, if we need it, provides us agility you.

Page 14 Page 16 1 MR. majority of what - what we're doing with this item.

It mentions some changes throughout 515. There aren't very many. We're just proposing to correct a few citations, really just some typos, and - and we will come back, at our meeting in January, with specific changes. But we just want to go through and clean up anything that needs to be cleaned up, so we're just sharing that information. And Kole is going to share with you about the statute.

MR. KENNEDY: Thanks, Patrick.

Like he said, Kole Kennedy. I'm speaking to you today in a different capacity. I get to introduce some rules.

What precipitated these changes was the Legislature passed the Act and updated some of the tire statutes, and I gave that to guys in Tab 6 of your packet. Tab 5, sorry.

And what most of that contains is it's a change to the Ag tire language. Our processors were having a difficult time picking up Ag tires, much less being reimbursed for those Ag tires. So what they did is they ended up passing some legislation that changed the way that it's funded. And it created two different categories of Ag tires; an \$8.00 category and a \$16.00 category, and that fee follows those Ag tires through.

23 There's different size requirements. And I can get into those specifics if you'd like. But the pertinent 24 25 things to this Council is going to be some of the other Page 20

1 multiple states and semi tires, that were on those trailers,

2 were not ever paid for in the past, and now they are being

brought in under the scope of the program. And we just had

4 to list all those new tires that are applicable to the

program now. And that is, basically, the -- the substance of the rule changes that we have.

7 We also went through and cleaned up - like Patrick 8 said, we're cleaning up citation changes. A really good 9 example is where it will list like 21-A ii, it should really

10 be - instead of two iis, it should be little "b." So we're 11 doing minor things like that through the tire statute --

12 tire regulations and throughout all of 515, as well.

And that's it. I'll take questions on this or the Act itself, if you have any questions,

MR. NEWMAN: Chairman, question.

CHAIRMAN SHEPHERD: Yeah, go for it.

17 MR. NEWMAN: Kole, none of the compensation for 18 folks that use - reuse the tires or repurpose the tires has 19 changed in this?

MR. KENNEDY: No, not with our rules.

21 MR. NEWMAN: So not with our positions - like

22 Liberty Tire can still receive - and Bristow still receive 23 the same compensation?

24 MR. KENNEDY: Yes. And the little minor change 25 that I'll call that is what we'll call a "tweak" is with the

Page 19

things that were associated with that change.

It removed erosion control installer from what is considered processing, and they cannot be reimbursed.

4 Erosion control projects can still go on, and that's like

5 tire mattresses with erosion areas on a riverbank or

something. Those don't - no longer are used in today's

Tire Program. So we had to go through -- since it was

removed in the statues, we are removing it from rule. One of the bigger changes was also -- if you will

remember a few years back, we changed "waste tire" to "used

11 tire." Well, there's an unintended consequence with that in 12 some of the rules that it says, "used used." So what used

13 to be "waste" or "used" is now "used used." So we had to go

14 through and redefine "reusable tire." So that's what you 15 would typically call a used tire in real language, so we put

16 that into the rules. And then throughout the rest of it,

17 it's mostly just cleaning up some of the remnants of the 18

erosion control installers.

And then on part seven, like 2171, we listed some of the new tires. Some of the new things that came in with the

21 Ag statutes were there's no fee for a bigger tire that's

22 like a doublewide semi tire. They call it a super single.

23 That created a fee, so we had to list that as an applicable

24 tire in our rules, as well.

And it also brought in trailers that are registered in

Page 21

Ag tires, where we would - like the DEQ would receive a cut

2 of it, like when it goes into the fund for an Ag tire, those

3 8 and \$16 categories actually follow that tire throughout

4 the process.

> So for your example on Liberty, what we'll call OTR now is they pick up an \$8 Ag tire. That \$8 goes right to them.

> > MR. NEWMAN: Okay.

MR. KENNEDY: Bill, did you have a question?

MS. HERSHEY: 1 -- so if I understand correctly,

tires are still being used for erosion control?

MR, KENNEDY: No. There's no erosion control installers in Oklahoma anymore. There's some still existing, but those are tending to fail.

MS. HERSHEY: Okay. So that's why it's - so

15 because that service is not provided any more, that's why --16

MR. KENNEDY: Correct.

MS. HERSHEY: - it's being taken out? 17

MR. KENNEDY: Yeah.

MS. HERSHEY: Thank you.

Oklahoma has submitted an application to EPA for program approval, and we did that August 1st. Because we have the 517s in place, we're well-positioned to be approved. And that application is under review right now at EPA. We hope to hear something soon. We're one of the first — and we may be the first state in the nation to apply for program approval, so they haven't quite figured out how to conduct a review or what they want	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	SECRETARY FIELDS: Mr. Adcock? If you recall, initially the EPA was going to require states to revise their Solid Waste Management plans to include provisions for regulating CCR and submit the plans to EPA for approval. Okay. Once approved, then we would be free to operate our Solid Waste Management programs without EPA oversight, much like the rest of our Solid Waste Program. Instead, now what states have to do is submit an application for CCR program approval to be operated under EPA oversight. EPA will oversee approved state programs with states providing periodic program reports to EPA. EPA will conduct periodic program reviews, which they've stated will occur at least every 12 years.
